Subject: Microsoft Settlement

As a computer professional with over 20 years experience I feel compelled to make my opinion known.

The proposed DOJ settlement is not good for computer professionals, the software business or the public.

There are many public postings available which detail the reasons why this is so much more persuasively than I am able in this email. I wish merely to add my voice to the multitude crying out to see justice done and a return to fair play in the field.

Yours sincerely,

Sean McKenna
